

SLIDING
QUICK HITCH

Row crop cultivating at high speed

The Innotag sliding quick hitch incorporates the latest technology to make row crop cultivation both fast and accurate. Robust construction and high capacity cylinders give it the ability to handle the heaviest 3 point mounted cultivators. When combined with the Innotag Culticam, you can cultivate as soon as rows are visible.

Sliding quick hitch specifications

- Pilots the row crop cultivator using a sliding mechanism
- Safe operation up to 15 km/h (9 mph)
- For light and semi-heavy row crop cultivators
- Complements perfectly with a Culticam and autosteer system
- Category 2, 3N and 3 quick attach system
- 50 cm (20 inches) of travel
- Tilt adjustment by a 3rd hydraulic cylinder (top link)
